

**DEVCON Protective Coating** system is a four-part solution specifically designed for advanced corrosion prevention of metal and concrete surfaces in the most challenging industrial environments. This system includes surface cleaner, a unique corrosion inhibiting primer and an epoxy based primer and topcoat. Capable of resisting upto 98% sulphuric acid, maintenance professionals trust DEVCON for the most critical applications in the harshest environments.

## Why Choose Devcon Protective coating?

Devcon's **4-Part Protective Coating System** is engineered to tackle corrosion where it strikes hardest on metal and concrete assets exposed to aggressive industrial environments. Whether you're operating in the steel, power, chemical, or infrastructure sector, Devcon delivers long-lasting, reliable protection you can count on.

This system resists **98% sulphuric acid**, withstands **high humidity, chemical attack, and abrasion**, and can be applied even on **rusted or weathered surfaces**. With **minimal surface preparation, easy application, and quicker return to service**, Devcon helps you cut downtime and extend asset life, backed by ISO 9227 and ISO 6270-1 test standards.

## Devcon Delivers Where Others Fail!

OTHERS	DEVCON Protective Coating
Requires <b>blasting</b> in all cases	Works <b>with or without blasting</b>
Needs complete <b>rust removal</b>	<b>Neutralizes rust</b>
<b>Poor performance</b> in harsh environments	<b>Unmatched performance</b> in harsh environments
<b>Thinner coverage</b>	<b>Durable film and higher coverage</b>
<b>3–6 months durability</b>	<b>12+ months durability</b> and field-tested
<b>High maintenance cost</b>	<b>Lowest maintenance cost</b>

## Application Flow

## Devcon Product Range

Product	Function
Cleaner Aqua100	Surface cleaner & flash rust preventer
Corrosion Primer CP-10	Rust neutralizer & sealer
Primer Pro 1030 AR	Epoxy primer with chemical resistance
Epoxy Coat 5045 AR	Final topcoat – acid & chemical resistant
