

# RUSTLICK 202

## TECHNICAL DATA SHEET – RUSTLICK 202 WET FILM ANTI CORROSION SPRAY

### DESCRIPTION

Rustlick 202 is a long-term indoor corrosion protection from rust and corrosion for machined surfaces and assemblies subjected to long periods of storage or adverse shipping conditions. The thin wet film is highly resistant to humidity and severe corrosive atmospheres

### RECOMMENDED APPLICATIONS

- Finished plastic and metal components
- In-process plastic and metal spares parts
- Bare metal surfaces and parts
- Plastic mould dies
- Corrosion shield for overseas shipments
- Winterizing farm machinery for outdoor storage
- Cable end sealing and pipe joint protection
- Protection of air conditioning and electrical equipment
- Used for brine and chloride resistance in refrigeration plants.
- Protection of equipment, tools, dies, moulds, jigs, pipes, shafts, housings, wire ropes, valves, gears.
- Other Industries:
  - Rubber and plastic processing
  - Transportation industry – repair and maintenance
  - Paper and pulp plants.

### BENEFITS

- Wet film gives better visibility of coating
- Can be removed easily
- Good corrosion and oxidation protection for long durations
- Gives uniform coating due to good film-forming properties

- Suitable for all climate zones
- Gives reliable performance at higher temperatures

### PRODUCT DATA

PROPERTIES	REFERENCE METHOD	VALUES
Appearance	Visual	Creamish white
Density- Bulk	ASTM D1298	0.80±0.02 g/ml
Optimum Film Thickness	IS 1154	45-50 µ
Film Type	Visual	Wet thin film
Surface coverage	IS 1154	8-9 m <sup>2</sup> /can
Salt Spray Resistance @ 50µ	ASTM B117	> 500 hrs

### PACK SIZE

400ml Aerosol Can

### STORAGE & SAFETY

This product is unlikely to present any significant health or safety hazard when used as recommended. Good standards of personal and industrial hygiene are to be maintained by the user. For more details, refer Safety Data Sheet.

\* Long term corrosion protection is subject to surface preparation and environment.
